LIFE SKILLS								
Thinking Skills: thinks creatively, makes decisions, solves problems, uses imagination, can learn and reason (CONTINUED)								
<i>Decision making</i> - sets goals and chooses the best way to reach them.	✓							
<i>Problem solving</i> - recognizes problems and figures out the best way to solve them.	✓							
<i>Seeing things in the mind's eye</i> - uses imagination to visualize objects, symbols, descriptions of things, or other information.								
<i>Knowing how to learn</i> - knows how to learn in a classroom and informally. Knows how to get more information on a topic by asking someone, going to the library, and so forth.								
<i>Reasoning</i> - discovers a rule or principle that describes the relationship between two or more objects or ideas and uses it to solve a problem. For example, you see the principle of the lever to pry up a large rock that is too heavy for you to lift.	✓							
Personal Qualities: shows responsibility, self-esteem, sociability, self-management, integrity, and honesty								
<i>Responsibility</i> - works hard to reach goals and does not give up easily. Keeps promises and commitments.	✓							
<i>Self-Esteem</i> - sees self positively. Believes he or she is a worthwhile person.	✓							
<i>Sociability</i> - friendly, adaptable, and polite in groups. Understands others' feelings and needs.	✓							
<i>Self-Management</i> - knows own abilities and limits and behaves appropriately (for example, staying in shallow water if you can't swim well yet). Sets personal goals and keeps track of progress toward them.	✓							
<i>Integrity/Honesty</i> - understands "right" and "wrong" behavior and is honest and consistent in actions.	✓
