

# Licensing of Right-of-Way Pesticide Applicators in Florida<sup>1</sup>

Frederick M. Fishel<sup>2</sup>

*This document explains the licensing and regulation of persons who apply restricted use pesticide applications to rights-of-way in Florida as regulated by the Florida Pesticide Law (Chapter 487) and administered by the Florida Department of Agriculture and Consumer Services.*

## Right-of-Way Pest Control

All persons who apply or supervise the use of restricted use pesticides in the maintenance of right-of-way areas must have a pesticide applicator license issued by the Bureau of Compliance Monitoring/Pesticide Certification Section. The Rights-of-Way Pest Control category is regulated by the Florida Pesticide Law (Florida Statutes, Chapter 487).

## Category Certification Standards

Applicators seeking a license in this category must demonstrate practical knowledge of:

- pests that occur in right-of-way areas accompanying roads, electronic lines and substations, pipelines, railroads, and similar areas;
- types of herbicides used on right-of-way areas;
- chemical control measures that pertain to the prevention and control of right-of-way pests;

- equipment or methodologies required to safely and effectively implement such measures;
- pesticide runoff and drift prevention;
- recognition of target organisms;
- actions necessary to prevent excessive foliage destruction; and
- potential effects on non-target and off-site organisms.

## License Classification

Certified right-of-way pest control applicators may be licensed as either public applicators or commercial applicators. These are the major differences:

- A **public applicator** is a licensed applicator employed by a public or governmental agency. The license is only valid when performing work for the public or governmental agency. The public applicator fee for a four-year license is \$100.
- A **commercial applicator** is a licensed applicator who is licensed to apply restricted-use pesticides on any property provided they are certified in the category for which the applications are made. A commercial applicator is usually a contract applicator. The commercial applicator fee for a four-year license is \$250.

UF/IFAS does not guarantee or warranty the products named, and references to them in this publication does not signify our approval to the exclusion of other products of suitable composition. Use pesticides safely. Read and follow directions on the manufacturer's label.

The Institute of Food and Agricultural Sciences (IFAS) is an Equal Opportunity Institution authorized to provide research, educational information and other services only to individuals and institutions that function with non-discrimination with respect to race, creed, color, religion, age, disability, sex, sexual orientation, marital status, national origin, political opinions or affiliations. For more information on obtaining other UF/IFAS Extension publications, contact your county's UF/IFAS Extension office. U.S. Department of Agriculture, UF/IFAS Extension Service, University of Florida, IFAS, Florida A & M University Cooperative Extension Program, and Boards of County Commissioners Cooperating. Nick T. Place, dean for UF/IFAS Extension.

## Examinations

Persons must successfully complete two examinations before they can apply to the department for a license. These examinations are a Core examination and the Right-of-Way Pest Control category examination. The Core examination may be taken at any UF/IFAS county Extension office. The Right-of-Way Pest Control category examination may be taken at a University of Florida IFAS County Extension Office that offers category examinations. No special qualifications must be met to take the examination. There is no fee to take the examinations.

## Study Materials

Manuals and study materials for Core and Right-of-Way Pest Control applicators who will be taking exams may be obtained from the UF/IFAS Extension Bookstore by calling 1-800-226-1764 or online at <http://ifasbooks.ifas.ufl.edu/>. The content of the Core exam is based upon the manual *Applying Pesticides Correctly* (Figure 1). The content of the Right-of-Way Pest Control exam is based upon the manual *Right-of-Way Pest Control* (Figure 2). Sample labels may be obtained from suppliers of pesticide products or online at CDMS by going to <http://www.cdms.net/manuf/manuf.asp>.

## Recertification

Applicators must recertify every four years. To recertify, applicators may take the examinations again or attend

Figure 2. SM 9: *Right-of-Way Pest Control*

training and obtain 8 continuing education units (CEUs) approved for the Right-of-Way Pest Control category and 4 CEUs approved for the Core category. Core CEUs cannot be used to meet the required Right-of-Way Pest Control CEUs. No substitutions of other types of CEUs are allowed. Opportunities to earn CEUs may be found at <http://www.flaes.org/>.

## Restricted Use Pesticides Applied in the Right-of-Way Category

Restricted use pesticides are seldom applied along rights-of-way.
