**Calathea makoyana** Peacock Plant

Edward F. Gilman

---

**Introduction**

Beautifully marked leaves in various shades of green, cream, white, pink, and silver held aloft on maroon stems make peacock plant an attractive, clump-forming plant for outdoor use or as a house plant (Fig. 1). The undersides of the leaves are dark purple making a striking contrast to the lighter colored tops of the leaves. Flowers are small and inconspicuous to all but the astute observer. The striking foliage gives this plant distinction.

---

**General Information**

- **Scientific name:** *Calathea makoyana*
- **Pronunciation:** kal-luhth-EE-uh mack-oy-AY-nuh
- **Common name(s):** peacock plant
- **Family:** Marantaceae
- **Plant type:** herbaceous; perennial
- **USDA hardiness zones:** 10 through 11 (Fig. 2)
- **Planting month for zone 7:** year round
- **Planting month for zone 8:** year round
- **Planting month for zone 9:** year round
- **Planting month for zone 10 and 11:** year round
- **Origin:** not native to North America

**Uses:** specimen; container or above-ground planter; border; ground cover; accent; suitable for growing indoors

**Availability:** generally available in many areas within its hardiness range

---

**Description**

- **Height:** 2 to 4 feet
- **Spread:** 2 to 4 feet
- **Plant habit:** upright
- **Plant density:** moderate
- **Growth rate:** moderate
- **Texture:** coarse

---

**Foliage**

- **Leaf arrangement:** spiral
- **Leaf type:** simple
- **Leaf margin:** entire

**Leaf shape:** ovate  
**Leaf venation:** pinnate  
**Leaf type and persistence:** evergreen  
**Leaf blade length:** 4 to 8 inches  
**Leaf color:** variegated  
**Fall color:** no fall color change  
**Fall characteristic:** not showy

### Flower

**Flower color:** white  
**Flower characteristic:** flowers periodically throughout the year

### Fruit

**Fruit shape:** unknown  
**Fruit length:** less than .5 inch  
**Fruit cover:** dry or hard  
**Fruit color:** unknown  
**Fruit characteristic:** inconspicuous and not showy

### Trunk and Branches

**Trunk/bark/branches:** typically multi-trunked or clumping stems  
**Current year stem/twig color:** green  
**Current year stem/twig thickness:** thick

### Culture

**Light requirement:** plant grows in the shade  
**Soil tolerances:** clay; sand; loam; slightly alkaline; acidic  
**Drought tolerance:**  
**Soil salt tolerances:** poor  
**Plant spacing:** 18 to 24 inches

### Other

**Roots:** sprouts from roots or lower trunk  
**Winter interest:** no special winter interest  
**Outstanding plant:** not particularly outstanding  
**Invasive potential:** not known to be invasive  
**Pest resistance:** very sensitive to one or more pests or diseases which can affect plant health or aesthetics

### Use and Management

A porous potting media high in organic matter is preferred for best leaf color and growth but avoid constantly wet soil as root-rots are quite damaging. Filtered light is needed as bright light will wash out the brilliant leaf colors. High humidity is vital for growth as a house plant, with daily mistings recommended. Plant on three-foot centers for mass planting outdoors. Peacock plant also works well as a tall ground cover toward the front of a shrub border. It performs well in a container on a deck or patio in the shade.

Propagation is by cuttings or division.

**Pests and Diseases**

Mites can be a serious pest problem, particularly if the plant is in a sunny location.

No diseases are of major concern.
