## IPM: Beyond Spraying

Integrated Pest Management, or IPM, is more than just spraying. With IPM, you use the most effective methods to suppress pest populations. Also, IPM is greener! Follow these five IPM steps to outsmart the pests:

STEP 1. Education and communication Get your customers involved; enlist their cooperation.

STEP 2. Identification Know all you can about pests and where to find them.

STEP 3. Monitoring Pest presence will determine your treatment method.

Keep pests from causing problems in the first place: Exclude and starve them.

STEP 4. Prevention

Use the treatment that poses the least risk to people, pets and the environment.

STEP 5. Treatment

Bait stations
